

Invitation to an ETUI Online course

October 2026

Dear Colleagues,

The impact of AI in the world of work has become a reality from some years now. The fast development of technology at all levels and in all sectors of activity turns the AI into a new topic for the agenda of trade unions across Europe. The course contributes to reinforce trade union proactive role, especially on emerging topics as the AI-driven technologies and the algorithms at workplace. It aims to empower trade union representatives in all sectors currently/potentially subject to AI assisted work by enabling them to understand the challenges and opportunities of the AI technologies at the workplace.

This **Introduction to AI** module, designed by our ETUI learning team with the help of our colleagues Aida Ponce and Valerica Dumitrescu, is addressed to trade union representatives and officials at any level interested in learning more about AI in the workplace and/or active in protecting workers while ensuring working conditions locally, regionally, sectorally or nationally.

Working languages

English.

Participants

The training is addressed to trade union representatives and officials at any level, interested in learning more about AI in the workplace and/or active in protecting workers while ensuring working conditions locally, regionally, sectorally or nationally.

This online course will run from October 12, 2026 with no end date. You can consult the module at your convenience as it is open-ended.

Anyone interested can register anytime. Access to the online module will be granted every following Monday morning.

Please register here:
